REMARKS**Present Status of the Application**

The Office action objected to FIG. 1 of the drawings as not being in compliance with 37 CFR 1.121(d).

The Office action objected to the abstract of the specification as not conforming to proper language and format.

The Office action rejected claims 4, 5 and 16 to 19 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter of the present application.

The Office action rejected claims 1 to 5 and 16 to 19 under 35 U.S.C. 102(b) as being anticipated by the Korean Patent (1020030010877).

The Office action rejected claims 1 to 5 and 16 to 19 under 35 U.S.C. 102(b) as being anticipated by the Japanese Patent (62161393).

After careful consideration of the comments in the Office action and the cited references, Applicants have amended FIG. 1 of the drawings and the abstract as instructed, and have canceled the rejected claims 1 to 5 and 16 to 19. The words "means" in the abstract are not replaced since they indicate "component" or "element" instead of "method."

Upon entry of the foregoing amendments, claims 6 to 15 remain pending in the present application. Allowance of all the pending claims is respectfully requested.
